INTEGRATIVE MEDICINE

NEW MODALITIES AND DIAGNOSTIC TOOLS

Care Center is proud to offer Integrative Medicine Services. Our veterinarians often prescribe physical rehabilitation for chronic conditions such as arthritis, neurological disorders, various issues causing pain or inflammation, overweight management, and post-operative conditions.

Rehabilitation may help if your pet experiences any of the following:

- Arthritis or joint stiffness
- Recent surgery or injury
- Decreased strength, muscle tone and endurance
- Weight management/obesity
- Having difficulty with mobility
- Limping or favoring a limb
- Reduced interest in play
- Soreness after exercise

NEW MODALITIES AND DIAGNOSTIC TOOLS

OUR NEW MODALITIESS AND DIAGNOSTIC TOOLS INCLUDE:

EXTRACORPOREAL SHOCKWAVE THERAPY

- Care Center is the only veterinary hospital in Cincinnati that offers this modality
- Utilizes shockwaves to cause biochemical change in the target tissue to treat pain and inflammation by triggering a self-healing process
- Targeted treatment for acute (sudden) and chronic (long-term) conditions of areas such as shoulders, elbows, carpi, stifle, tarsi, spine, and hips, as well as wounds

PHOTOBIOMODULATION (CLASS IV LASER THERAPY)

- Most effective laser therapy treatment
- Results in decreased inflammation, decreased pain and accelerated healing

STANCE ANALYZER

- Objective measurements that assess the percent of weight bearing on each limb
- Allows objective measurements to be tracked overtime, allowing for adjustments of treatment plans to achieve the best outcome for patients
